blockchain (1 years) at first

- Contributed to projects at undefined using MERN, JavaScript, Git, Blockchain.
- Collaborated with teams to deliver high-quality solutions.
- Gained hands-on experience in a professional environment.

EDUCATION

BCA, Shreyarth University (3 years, Graduated: 2024)

PROJECTS

BlockInvoice (MERN)

[View Project](#)

The Invoice Generator App is a simple and efficient software built to create, manage, and track invoices. It's built with technologies like Java, HTML5, CSS3, and MySQL for storage. Key features include customer management, automatic calculations, customization of invoice design, and reminders for due invoices. This project provides great convenience for businesses to handle their billing, promoting accuracy and time-efficiency.
